

JOIN US FOR OUR COMMUNITY SCIENCE & ART FAIR!

Art and ecology with the Minneapolis-St. Paul Long Term Ecological Research program

Curious about ecological research in the Twin Cities? Have concerns or questions about your local ecosystem or want to meet scientists researching urban issues? Drop by the MSP LTER community gathering for art and science activities, conversation with researchers and community members, and more! Light snacks and refreshments will be provided.

WHEN: Monday May 20th, 2:00 – 6:00pm

WHERE: Mississippi Watershed Management Organization (MWMO)
2522 Marshall St NE, Minneapolis, MN 55418

PARKING: There is a parking lot with limited spaces and also street parking. Bike parking is available on site.

MSP LTER - Minneapolis-St. Paul Metropolitan Area Long Term Ecological Research Program

The MSP LTER is part of a network of LTER sites funded by the National Science Foundation working together to broaden our understanding of the nation's ecological services.

It brings together dozens of researchers from the University of Minnesota, University of St. Thomas, USDA Forest Service, The Nature Conservancy, and Water Bar, to study how urban stressors affect the ecological structure and functioning of urban nature, including pollinators, urban forests, urban watersheds, and lakes and streams.
